

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

British steamship *Amphitrite* for New Orleans, July 3, with 24 crew and no passengers; holds and living quarters fumigated.

No further cases of yellow fever have been reported since the case on May 22. Malarial fever is on the increase. Large numbers of negroes continue to arrive from the West India Islands, especially Barbados, and shortly after their arrival are found crowding the hospitals and dispensaries with cases of malarial fever. *Anopheles* mosquitoes now infest the town in swarms and as a result malaria is quite prevalent among the white population. I have noticed that those who adhere rigorously to the prophylactic use of quinine remain comparatively, if not entirely, free from the disease.

*Report from Bocas del Toro, fruit port—Quarantine against Limon.*

Acting Assistant Surgeon Osterhout reports as follows:

Week ended July 7, 1906. Present officially estimated population not obtainable; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage.
June 30	Belvernon .....	Mobile.....	21	0	0	0
July 4	Greenbrier.....	New Orleans.....	47	0	0	0
5	Fort Morgan.....	Mobile.....	25	0	0	0

PERU.

*Report from Callao—Inspection of vessels—Plague in Peru—Plague and smallpox in Chilean ports.*

Assistant Surgeon Wightman reports, June 18, as follows:

Week ended June 16. Vessels dispatched by this office as follows:

British steamship *Columbia* on June 11 for Ancon, Canal Zone, with general cargo, 4 new members of crew, 47 cabin and 62 steerage passengers from this port.

German steamship *Memphis* on June 12 for San Francisco, Cal., with general cargo, with 6 passengers from here, and no change in the crew.

Chilean steamship *Palena* on June 16 for Ancon, Canal Zone, with general cargo, 2 new members of crew, 72 cabin and 75 steerage passengers from this port.

There has not been any new case of plague reported in Lima since my last report. Fumigation of houses where dead rodents are found continues, the last reported to this office being on the 4th instant.

The following figures are taken from the last report of plague in Peru received from the director de salubridad:

Locality.	Cases June 1.	New.	Recov-ered.	Died.	Remain- ing June 6.
Lima .....	4	1	3	1	1
Paita .....	0	1	0	1	0
Trujillo district .....	6	0	5	1	0
Lambayeque .....	3	0	1	0	2
Mollendo.....	2	0	2	0	0
